iComm 8CX

Passive Coaxial
Monitor Speaker

VAL audio

Die Liebe zur Musik

OVERVIEW

The VAL Audio ICOMM 8CX is a premium passive coaxial monitor speaker designed for high-fidelity sound reproduction in professional and luxury environments. At its core is an advanced coaxial driver system, where the 8-inch low-frequency (LF) driver and 1.7-inch high-frequency (HF) compression driver are mounted on the same axis. This configuration provides perfect phase alignment, resulting in exceptional clarity, uniform dispersion, and precise imaging. Unlike conventional two-way speaker designs, the coaxial setup eliminates lobing and phase issues, ensuring a natural and immersive listening experience.

The spherical ABS enclosure has been acoustically optimized to minimize resonances and diffraction, further enhancing clarity and smooth response. Its high quality gloss finish offers a luxurious, contemporary aesthetic that complements any environment — from upscale lounges and clubs to premium retail spaces and modern homes.

The speaker is designed with flexible mounting solutions, supporting wall mount and ceiling mount brackets, allowing seamless integration into architectural spaces. Input is provided via a single Speakon NL4 connector, ensuring secure and professional connectivity.

KEY FEATURES

- **True Coaxial Design** – uniform coverage and precise sound imaging
- **High Power Performance** – 200W RMS / 800W Peak for professional-grade output
- **Impressive Output** – delivers up to 122 dB peak SPL
- **Luxury Aesthetics** – available in gloss black or gloss white finishes
- **Spherical Enclosure** – minimizes diffraction and enhances clarity
- **Seamless Integration** – compact form factor blends into any space
- **Flexible Installation** – wall and ceiling mounting options
- **Professional Connectivity** – single Speakon NL4 input

APPLICATIONS

- **Nightclubs & Lounges** – immersive, high-output sound for stylish venues
- **Restaurants & Cafés** – refined design with professional-grade audio
- **Corporate & Hospitality Spaces** – premium audio for conference halls, hotels, and showrooms
- **Luxury Homes & Home Theaters** – high-fidelity sound in modern living spaces
- **Retail Stores & Boutiques** – enhances customer experience with elegant sound and design

SPECIFICATIONS	
Power Handling (AES Standard)	200W RMS / 400W Program / 800W Peak
Impedance	8 ohms
Frequency Response	75Hz – 20kHz
Average Sensitivity	93dB (1W/1m)
Calculated Max SPL	116dB Continuous / 119dB Program / 122dB Peak
Low Frequency driver	8″ coaxial
High Frequency driver	1.7″ driver coaxially mounted
Dispersion	80° conical
Input Connector	1 × Speakon NL4
Enclosure	ABS spherical design
Finish	Gloss Black / Gloss White, Teak Finish
Mounting Options	Wall mount bracket (included), ceiling mount bracket (optional)
Size	300 x 260 mm (spherical)
Net weight	8.30 Kg
