## OVERVIEW

The VAL Audio X15CXA is a next-generation powered coaxial stage monitor designed to meet the demands of today's professional performers and sound engineers. At its core is a precision-engineered coaxial transducer system, where a 15" low-frequency driver and a 2" high-frequency compression driver share a common axis. This alignment ensures phase-accurate sound reproduction, seamless frequency integration, and consistent coverage across the entire listening area — a critical advantage for stage monitoring where clarity and uniformity are paramount.

Driven by a high-efficiency Class-D amplifier delivering 1200W Peak / 600W RMS, the X15CXA combines raw power with refined control. The integrated DSP offers four presets, EQ-high/mid/low control, delay, and high-pass filtering, allowing the monitor to be adapted instantly for vocals, instruments, or full-range stage mixes. A built-in two-channel mixer with mic/line inputs, AUX and XLR output further enhances flexibility, making the X15CXA equally at home in touring rigs, corporate events or fixed installations.

Designed with both performance and practicality in mind, the X15CXA features a low-profile wedge enclosure that keeps sightlines clear while ensuring optimal monitoring angles. Multiple handles, a rugged protective grille, and a pole-mount option add versatility and durability, making it a reliable workhorse for the most demanding live sound environments.

## KEY FEATURES

- **Coaxial Speaker Design** – 15" woofer with 2" HF compression driver in coaxial alignment for natural, phase-accurate sound
- **High-Powered Amplification** – Class-D bi-amplified system delivering 1200W Peak / 600W RMS
- **Integrated DSP** – Multi-function DSP with 4 presets, EQ, delay, and high-pass filter
- **Flexible Connectivity** – Two-channel mixer with mic/line input, ¼" combo jack, 3.5mm AUX and XLR mix output
- **Optimized Frequency Response** – Wide, balanced coverage ensuring clarity on any stage
- **Portable & Versatile** – Low-profile wedge design with pole-mount option and multiple carry handles
- **Durable Construction** – Rugged cabinet, protective grille, and professional-grade components for touring reliability

## APPLICATIONS

The VAL Audio X15CXA is a versatile stage monitor designed for demanding professional use. Its powerful coaxial design, DSP control, and rugged build make it ideal for:

- Live stage monitoring for vocalists and musicians
- Touring and rental systems requiring durability and flexibility
- DJ and club use with high output and clarity
- Corporate events and presentations where speech intelligibility is critical
- Houses of worship and fixed installations needing reliable, full-range monitoring

SPECIFICATIONS	
System Type	Powered Coaxial Stage Monitor
Frequency Response	45Hz – 20kHz
Maximum SPL	133dB
Sensitivity	99dB
Coverage (H x V)	90° x 90°
Power Amplifier	Class D, Bi-amp 1200W Peak / 600W RMS
Integrated DSP	Master level control Fixed 4 Presets EQ – High, Mid, Low Delay High pass
LCD Display	Integrated with brightness control
Low Frequency driver	1 x 15" (3" VC)
High Frequency driver	2" compression driver (coaxially mounted)
Connectors	2 x XLR/TRS combo switchable Mic/Line Inputs 1 x 3.5mm stereo Input 1 x XLR Mix out
AC Power Input	PowerCON® Input and Thru connections - 230VAC, 50Hz
Input Power Consumption	At idle: 20W, At full power: 340W
Enclosure	Low-profile wedge, pole-mount capable, high quality wooden cabinet
Carry Handles	Yes
Monitor Wedge	Yes
Grille	Steel grille with acoustic foam
Finish	Polyurea paint
Colour	Black
Dimension (HxWxD)	390 x 535 x 490 mm
Net Weight	22.65 Kg
